DETAILED ACTION

Applicants are informed that the rejections of the previous Office action not stated below have been withdrawn from consideration in view of the Applicant's arguments and/or amendments.

Claims 1-44, 46-56, 58, 59, 61-97 are examined on the merits.

Election/Restrictions

Claims 1-36, 48-52, 58, 59, 61-81 and 92-97, directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 37-44, 46, 47, 53-56, and 82-91, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction and election of species requirements as set forth in the Office action mailed on May 30, 2007 are hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-44, 46-56, 58, 59, 61-97 are allowed.

The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: the nearest prior art of Polo et al. (US PGPub 2003/0148262 A1) teach a related alphavirus replicon vector which expresses heterologous genes and non-structural proteins 1-4 between 5' and 3' replication recognition sequences. However, Polo et al. fails to teach or suggest separating the non-structural (nsp) proteins 1-3 from nsp 4 with a promoter/IRES, heterologous gene cassette in the 5' to 3' orientation. Moreover, as stated by applicants in their April 9, 2008 communication, Polo et al. teach the use of either a subgenomic promoter or an IRES site but not both in a cassette format.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mary Miller on April 9, 2008.
